

INSTREAM FLOWS FOR RIVERINE RESOURCE STEWARDSHIP – REVISED EDITION

Contents

<i>Figures</i>	<i>xi</i>
<i>Tables</i>	<i>xv</i>
<i>Foreword</i>	<i>xvii</i>
<i>Preface</i>	<i>xix</i>
<i>Preface to First Edition</i>	<i>xxi</i>
<i>Acknowledgments</i>	<i>xxiii</i>
<i>Executive Summary</i>	<i>xv</i>
Chapter 1. Introduction	1
Historical	1
Obstacles to Instream Flow Protection.....	6
Purpose .6	
Chapter 2. Instream Flows in the Context of Riverine Ecology	9
Developing the Rationale for Instream Flow Prescriptions.....	9
Hydrology	9
Riparian Zone	11
Valley Form and Floodplain Maintenance.....	15
Geomorphology	17
Channel Form	17
Sediment Transport.....	20
Biology.....	21
Life History Cues.....	22
Hydraulic Habitat.....	23
Water Quality.....	29
Temperature.....	30
Fine Sediment	32
Connectivity.....	32
Nutrient Cycling and Energy Pathways	34
Fragmentation and its Effects on Fish Movement	38
Disconnections Caused by Changes in Water Quality.....	39
Estuarine Production.....	40
Ecological Considerations for Habitat and Scale	41
Spatial Scales	41
The Global Scale.....	42
The Watershed Scale.....	42
The Stream Segment Scale.....	42
The Macrohabitat Scale	42
The Mesohabitat Scale	44
The Microhabitat Scale	44
The Temporal Scale	44

Lessons From Stream Ecology.....	45
The Importance of Flow Variability	45
The Need for Ecosystem Level Management	46
Chapter 3. Public Involvement	51
Public Involvement Opportunities	52
Other Useful Communication Tools	55
Incorporating Public Input	57
Encouraging Public Involvement	58
Making Information Understandable	58
Chapter 4. Legal and Institutional Elements.....	61
Notes on Terminology and Scope of Legal Policies	62
The Public Trust Doctrine.....	62
Scope of the Public Trust Doctrine	62
Development of the Public Trust Doctrine in the United States	63
Public Trust Doctrine Opportunities in Canada	64
Duties of Trustees	65
Instream Water Rights.....	69
Federal Laws	70
State and Provincial Opportunities.....	71
Private Instream Flow Opportunities	72
Legal Status of Instream Flow Protection	72
Water Rights and Long-Term Certainty.....	73
Beneficial Use	74
Public Interest	75
Connectivity of Surface Flow and Groundwater.....	76
Fishery and Wildlife Agency Role.....	77
Water Conservation and Instream Flow.....	78
Water Quality Standards	80
Public Project Funding.....	81
Chapter 5. Instream Flow Programs and Site-Specific Prescriptions	83
Part 1. Developing Instream Flow Programs	83
Determining and Reporting Instream Flow Status	84
Full Instream Flow Protection.....	85
Comprehensive Ecologically Based Instream Flow Management.....	85
Partial Ecologically Based Instream Flow Management.....	86
Threshold Level Instream Flow Protection.....	86
No Instream Flow Conservation	86
Setting Program Goals and Objectives.....	87
Agency Mission Statements.....	87
General Aquatic Resource Goals	88
Specific Instream Flow Program Objectives.....	89
Establishing the Institutional Process for Determining Instream Flows.....	91
Problem Identification and Issue Description	92
Regulatory Framework	92
The Role of Legal Counsel	93
Stakeholder Involvement	94
The Role of Negotiation.....	94
Interdisciplinary Teams.....	95
Comprehensive Water Resource Planning.....	95
Drought Planning	96

Part II: Establishing Site-Specific Instream Flow Prescriptions	98
Developing Ecologically Based Instream Flow Prescriptions.....	98
Documenting the Rationale for Program Prescriptions.....	103
Riverine Components.....	103
Hydrology: Stream Gaging.....	103
Hydrology: Streamflow Measurement Protocol.....	103
Hydrology: Developing Synthetic Hydrologic Information.....	103
Hydrology: Land Use Practices.....	105
Biology: Habitat.....	105
Biology: Ice Processes.....	106
Geomorphology: Channel Form.....	107
Geomorphology: Flushing Flows.....	109
Geomorphology: Channel Modification.....	110
Geomorphology: Instream Mining.....	111
Water Quality.....	112
Connectivity: Lateral (Riparian Zone).....	112
Connectivity: Lateral (Floodplains).....	113
Connectivity: Vertical.....	114
Connectivity: Longitudinal.....	116
Determination Process.....	117
Physical Setting and Baseline Information.....	118
Legal Constraints.....	120
Expected Water Use.....	120
Study Objectives.....	120
Tools.....	121
Study Implementation.....	121
Alternatives Analysis.....	122
Problem Resolution and Dealing With Uncertainty.....	122
Monitoring.....	123
Adaptive Management.....	124
Developing and Implementing An Instream Flow Study.....	128
Chapter 6. Instream Flow Assessment Tools	129
Instream Flow Assessment Techniques.....	130
Cautions About Standard-Setting Techniques.....	131
Temporal Considerations.....	132
Stream Component Tools.....	132
Hydrology.....	134
Indicators of Hydraulic Alteration (IHA).....	134
Range of Variability Approach (RVA).....	135
Biology/Habitat.....	137
Two-Dimensional Hydraulic Models.....	137
New England Aquatic Base Flow (ABF) Standard.....	139
Biological Response to Flow Correlation Method.....	140
Feeding Station Method.....	142
Flow Duration Curve Methods.....	143
Index of Biotic Integrity (IBI).....	144
Target Fish Community Assessment.....	146
Physical Habitat Simulation (PHABSIM).....	148
MesoHABitat SIMulator (MesoHABSIM).....	150
Hatfield-Bruce Western Salmonid Regressions.....	152
The Pennsylvania/Maryland Instream Flow Model.....	153

Plunge Pool Method.....	155
Riverine Community Habitat Assessment and Restoration Concept (RCHARC) Method.....	156
Single Transect Hydraulic-Based Habitat Methods	158
Tennant Method	159
Washington Toe-of-Bank-Width Method (Toe-Width Method).....	161
Wetted Perimeter	163
Geomorphology.....	165
Channel Maintenance Flows in Gravel-Bed Streams.....	165
Flushing Flow: Empirical, Sediment Transport Modeling, and Office Based Hydrologic Methods.....	166
Geomorphic Stream Classification System.....	170
Hydraulic Engineering Center-6 Model (HEC-6).....	171
Hydraulic Engineering Center – River Analysis System (HEC-RAS).....	172
Water Quality.....	173
Enhanced Stream Water Quality Model (QUAL2E)	173
Stream Network Temperature Model (Sntemp) and Stream Segment Temperature Model (Sstemp)	175
Seven-Day, Ten-Year Low Flow (7Q10)	177
Connectivity	179
Floodplain Inundation Method.....	179
Migration Cue Method.....	180
Powers and Orsborn Salmon Barrier Method	181
Tidal Distributary / Estuary Method	182
Salinity Based Estuary Inflow Methods and Approaches	183
Multiple Components.....	185
Demonstration Flow Assessment (DFA) Method.....	185
Instream Flow Incremental Methodology (IFIM).....	187
 Chapter 7. Conclusions	 191
 <i>Appendixes</i>	
<i>Appendix A. Summary of Instream Flow Council Policies</i>	195
<i>Appendix B. An Instream Flow Awareness Campaign</i>	201
<i>Appendix C. Summary of the Public Trust Doctrine</i>	205
<i>Appendix D. Alberta Water Act</i>	207
<i>Appendix E. Example of How to Conduct an Instream Flow Study</i>	209
<i>Glossary</i>	
<i>References</i>	225
<i>About the Authors</i>	251
